

Viridian Systems Limited

Camera Surveys

Viridian Systems provide comprehensive Leachate & Gas well condition survey service. Camera surveys of wells can reveal the down well condition & help to identify foreign debris and assist with pump placement and retrieval. The resultant video can be reviewed at client's premises and assist in decision making.

Our service consists of a camera team equipped with the latest down well camera survey equipment. All surveys will be recorded and then edited in-house and can be transcribed to the following formats

- DVD (for use on any domestic machine)
- SVCD (for use on computers)
- AVI (for use on computers)

Camera surveys are an effective means of identifying problems associated with wells including:

- Build up of debris
- Collapsed Wells
- Joint Displacement
- Ingress of free flowing solids (sands etc)
- Pump retrieval
