

Viridian Systems Limited

Silt-Pro

Pipeline Silt Traps

Constant blocking of leachate pipelines due to silt build-up is a common and costly problem for landfill operators. Viridian can offer a cost effective and practical solution to help alleviate the effects of silt.

The Viridian *Silt-Pro* can be retrofitted to any pressure or non-pressure leachate system and is designed for easy maintenance.

Effective removal of silt and gross solids can also reduce carbonate scale formation in a pipeline, a major cause of blockages.

The *Silt-Pro* has been proven to capture silt easily and reduce the problems of blocked pipes on many landfill sites.

A bauer connection or pressure release valve
Can be fitted to the Silt-Pro
